

# INTERNATIONAL WORKSHOP ON **HIV &** **AGING** 2022

VIRTUAL MEETING | 13-14 OCTOBER 2022

## PROGRAM CHAIRS

**Kristine Erlandson**  
**MD, MS**  
University of Colorado  
Denver- Anschutz  
Medical Campus,  
United States

**Joseph Margolick**  
**MD, PhD**  
Johns Hopkins Bloomberg  
School of Public Health,  
Baltimore

**David Moore**  
**PhD**  
University of California,  
San Diego,  
United States

## ABOUT THE WORKSHOP

The **13th International Workshop on HIV & Aging** will be held virtually on **13-14 October 2022**. The workshop remains the only platform worldwide for international, cross-disciplinary scientific exchange on the increasingly recognized difficulties encountered in the clinical care and design of studies to improve the care of persons aging with HIV.

Research is truly needed to address the unique psychosocial challenges faced by this growing population. The elderly population living with HIV is particularly vulnerable to social stigma, which can lead to depression, psychological distress, compromised adherence to therapy, and overall poor treatment outcomes and quality of life.

Through panel discussions, debates, and Q&A sessions, the program will foster an interactive dialogue among experts in the HIV field. At the same time, early-career investigators are offered the opportunity to present their valuable research and give their input on topics such as neurocognitive impairment, inflammation, immunology and geriatric syndromes.

The meeting aims to gather researchers, healthcare professionals across different disciplines, and community advocates to discuss and prompt solutions that will benefit the aging population living with HIV.

## Learning objectives

After attending this workshop, participants will be able to:

- Outline the impact of using anti-inflammation agents in chronic inflammation on aging;
- Describe the biological clock concept and use the potential indicators to get an impression on aging;
- Categorize the manifestations of neuro cognitive impairment and their effect on the aging progression;
- Inform on the role geriatric clinics can play in providing dedicated care.

## ORGANIZING COMMITTEE

**Kristine Erlandson, MD, MS**  
University of Colorado  
Denver- Anschutz Medical Campus,  
United States

**Julian Falutz, MD, FRCPC**  
McGill University,  
Canada

**Meredith Greene, MD**  
University of California San  
Francisco,  
United States

**Scott Letendre, MD**  
University of California San Diego,  
United States

**Jules Levin, MS**  
National AIDS Treatment Advocacy  
Project, New York,  
United States

**Joseph Margolick, MD, PhD**  
Johns Hopkins Bloomberg School of  
Public Health,  
Baltimore

**David Moore, PhD**  
University of California,  
San Diego,  
United States

**Savita Pahwa, MD**  
University of Miami School  
of Medicine,  
United States

**Jonathan Schapiro, MD**  
National Hemophilia Center,  
Sheba Medical Center,  
Israel

**Madhav Thambisetty, MD**  
NIH,  
United States

**Russell P. Tracy, PhD**  
University of Vermont (UVM),  
Vermont

# CALL FOR ABSTRACTS

We invite researchers from all over the world to submit their abstract for the 13th International Workshop on HIV & Aging. Do not miss the opportunity to join the leading experts in the field and contribute to the shaping of the scientific program.

Abstracts can be submitted under one of the following categories:

- Effect of Aging on Organ Systems (Renal, Gut, Cardiovascular, Hepatic, Endocrine)
- Geriatric Syndromes
- HIV/Aging in the International Setting
- Immunology
- Interventions
- Malignancy
- Models of Care
- Neurology/Psychology
- Pharmacology
- Quality of Life/Well-Being

Successful candidates will be invited for an oral or poster presentation. A registration fee waiver will be offered to all early-career investigators with an accepted abstract. A 50% discount on the registration fee will be provided to the early-career investigators without an accepted abstract.

**Authors can submit their abstracts electronically until 22 July 2022.**

Visit our website for additional information on abstract submission and available discounts for authors of accepted abstracts.

**To be eligible as a Early-Career Investigator you should:**

- Be a current Master/ PharmD/ PhD student; OR
- Have obtained an MD/ PharmD/ PhD degree in the last five years.
